The Symposium in Probability and Statistics in honor of Charles Stein on his 90th Birthday

Is jointly organized by
Department of Statistics, Stanford University
and Institute for Mathematical Sciences,
National University of Singapore

ORGANIZING COMMITTEE

Peter Bickel
University of California, Berkeley
Louis Chen
National University of Singapore
Morris L. Eaton
University of Minnesota, Minneapolis
Wei-Liem Loh
National University of Singapore
Carl Morris
Harvard University
Wing Hung Wong
Stanford University

The Speakers

- Andrew Barbour
  University of Zurich
- Peter Bickel
  University of California, Berkeley
- Larry Brown
  University of Pennsylvania
- Persi Diaconis
  Stanford University
- Morris L. Eaton
  University of Minnesota, Minneapolis
- Bradley Efron
  Stanford University
- Carl Morris
  Harvard University
- David Siegmund
  Stanford University

Main Quad, Building 370
450 Serra Mall, Room 370
Stanford University
Among the great mathematical statisticians of the 20th century, some left their marks by developing new theories and techniques, and others by discovering surprising results that shattered long-held beliefs. Charles Stein is unique in his ability to do both. He is truly a giant among giants.

Wing Wong
